Organization Announcement

I am pleased to announce David Jochum has joined PMF as Quality Assurance Manager. David's key responsibilities are to enhance PMF's AS9100 / ISO 9001:2000 quality management system and the quality of day-to-day production operations. He will develop processes, procedures and metrics to ensure high quality parts are delivered on time. He will assist the PMF Team on Lean initiatives to reduce operating costs and manufacturing lead times.

David brings considerable quality management experience to PMF, working for companies such as Aurora Specialty Textiles, Senior Flexonics, and Advantek. He has a BS in Chemical Engineering, and is a certified Six Sigma Green Belt and a certified Quality Engineer.

David replaces Hank Soper, who led the quality and process improvement initiatives at PMF for more than 20 years. Hank and his wife Diane have retired near Paducah, Kentucky.

Please join me in welcoming David to the PMF / TSI family.

Blair P. Gaida

President & General Manger
